Patient _____

Date _____

- ☐ Set Condyles on SAM
- ☐ Condylar Guidance Right _____ Left _____
 - ☐ Green Insert
 - ☐ White Insert
 - ☐ Red Insert
- ☐ Lateral Side Shift Right _____ Left _____
 - ☐ Metal Insert
 - ☐ Green Insert
 - ☐ White Insert
 - ☐ Red Insert
- ☐ Make incisal edge matrix
 - Incisal edges of porcelain crowns fit the index same as the temps
- ☐ Definitive, even, flat, surface to surface contact of both central incisors when end to end in protrusive.
 - Lower centrals incisal edges are level with upper incisal edges in protrusive.
 - If right and left condylar guidance is not the same, the lower incisal edges will be slanted in CR
- ☐ All anterior teeth have a definitive contact point
- ☐ Leave the leading edge of lowers sharp and in direct contact with the upper lingual.
 - I will create the bevel and freedom in centric.
- ☐ Even protrusive contact of both central incisors
- ☐ Cuspid Rise to a smooth crossover onto anterior teeth (no drop off from cuspid to lateral or central incisor)
- ☐ Match temps
- ☐ Better than temps
