## 8 Key Questions for Specific TMD Diagnosis and Treatment

Patient's Chief Concern (CC):

1. Is there temporomandibular joint damage that needs to be treated?
2. Are the muscles associated with the TMJ sore and or dysfunctional?
3. Is there Occlusal Disharmony with the Maxilla, Temporal bone, Mandible and muscles?
4. Is there cervical damage or misalignment that needs treated (including muscles)?
5. Is there parafunction that needs to be managed?
6. Are there any whole body, systemic issues affecting health, comfort, or the ability to heal?
7. Are there any other sources of pain or dysfunction?
8. Are any of the above affecting quality of life? (Symptoms)
